BELL-MARK

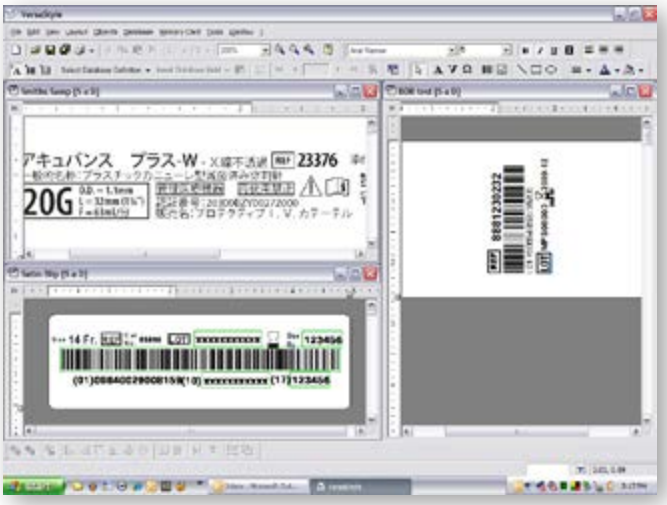
EasyPrint Table Top

For Use Without A Packaging Machine

Bell-Mark's Intermittent motion EasyPrint can be configured for applications that do not require the use of a packaging machine.

We call this the Table Top System which was developed for manual or semiautomatic coding requirements to imprint pricing, date codes, lot numbers, product identification and expiration dates.

The Table Top coding system is ideally suited for unique packages that are typically run manually such as plastic bags, pouches, metal cans, chipboard boxes, electrical components, and automotive parts.



Simple to use GUI for label design

The EasyPrint is a programmable, high-speed, thermal transfer coder and printer. Bell-Mark's EasyPrint delivers high quality, variable coding and printing of code dates, prices, company logos, real time and bar codes on all flexible films, Tyvek, labels, cartons and foil.

The EasyPrint offers the largest available print area and satisfies a large variety of printing needs. The versatile EasyPrint software makes it easy to create new label formats.

The patented ribbon-saving feature is software controlled resulting in the lowest ribbon cost per print.

- ✓ SELL BY DATES
- ✓ LOT NUMBERS
- ✓ BAR CODES
- ✓ NUTRITIONAL FACTS
